KUNAL KASHYAP

Kunalkash50@gmail.com | **+91-9958334257** | LinkedIn | GitHub | Kaggle | Portfolio

PROFESSIONAL SUMMARY

Results-driven Data Scientist specializing in production-grade ML systems and healthcare analytics. Experienced in architecting end-to-end solutions from data validation to deployment, with proven success in time series forecasting, deep learning pipelines, and RESTful API development. Passionate about transforming complex datasets into actionable insights through advanced statistical modeling and interactive dashboards.

EDUCATION

Bachelor of Arts (Hons) English 2025

University of Delhi, New Delhi

TECHNICAL SKILLS

Languages & Frameworks: Python, TensorFlow, Keras, PyTorch, Scikit-learn, FastAPI, LangChain, Streamlit, XGBoost, LGBoost, CatBoost

AI/ML Specializations: Deep Learning (ANN, CNN, RNN), NLP, Computer Vision, Generative AI, Time Series (ARIMA, SARIMA), Chatbots

Data Science: NumPy, Pandas, EDA, Matplotlib, Seaborn, Plotly, Feature Engineering, Statistical Analysis

Tools & DevOps: Docker, Git, Jupyter Notebook, VS Code, Render

PROFESSIONAL EXPERIENCE

Machine Learning Intern | Unified Mentor Pvt. Ltd., India *Jan 2026 – Apr 2026*

- Developing ML models for real-world business applications with focus on predictive analytics
- Building data pipelines and implementing ML algorithms for classification and regression tasks

Data Science Intern | InLighnX Global Pvt. Ltd., India *Nov 2025 – Jan 2026*

- Developed and deployed ML models using Python, TensorFlow, and FastAPI for business automation
- Applied NLP and deep learning techniques for predictive modeling with comprehensive EDA workflows

PROJECTS

Workforce Attrition Patterns & Risk Hotspot Analysis | Python, ML, Streamlit | LIVE DEMO
- Developed an ML-powered HR analytics dashboard to identify attrition drivers and predict employee turnover risk

Movie Recommendation System | Python, NLP, Streamlit | LIVE DEMO
- Built a content-based recommender system using cosine similarity to suggest personalized movies

Laptop Price Predictor | Python, ML, Streamlit | LIVE DEMO
- Created a regression-based model to estimate laptop prices from user-defined specifications

Cricket Score Prediction System | Python, ML, Streamlit | LIVE DEMO
- Designed a predictive model to forecast final cricket scores based on live match conditions

IPL Match Win ML Prediction System | Python, Streamlit | LIVE DEMO
- Developed a classification model to predict real-time win probabilities using match features

ADDITIONAL INFORMATION

Languages: English (Fluent), Hindi (Native) | **Certifications:** Generative AI & NLP Training
